

Finding Drop Ship Suppliers

Finding suppliers should not be difficult. Especially when you have an open mind about what you want to sell. So even though you will have probably decided on a niche at this stage, you can still be open minded about sub-niches and types of products.

Start off by doing a Google search for drop ship suppliers. For example, if one of the products on my list of possibles, is hip hop jewelry, then I would do a search like below:

The screenshot shows a Google search interface with the query "hip hop jewelry dropshippers". The search results are as follows:

If you don't find what you need by searching for something specific, eg 'hip hop jewelry drop shippers', try a broader search, eg, 'jewelry drop shippers' and then check out the websites to see if they have the type of jewelry you want.

You should also try searching wholesalers as opposed to drop shippers. That's because not all wholesalers advertise their drop shipping services and therefore may not show up in the search results for drop shippers.

If you are looking for results from a country other than the country you are searching from, try adding 'in the UK' or 'in the US' or 'in France', etc. to get more relevant results for the country that you want to search in. That's because Google will by default show you results that THEY believe are most relevant to your location. So you need to try and 'tell' Google what you want.
